Spillets formål: At rekonstruere firkanten ved anvendelse af samtlige brikker

Spillets forløb: Læg de 11 brikker og rammen på bordet og udfordringskortene ved siden af. Træk et udfordringskort og læg de angivne brikker på rammen, som anvist på kortet. Prøv derefter at få de resterende brikker til at passe ind, den rillede side skal vende opad, således at rammen fyldes ud, uden at afgrænsningen overskrides. Der er kun én mulig løsning til hver enkelt udfordring!

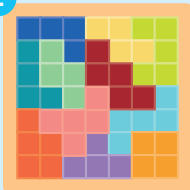

Løsningerne findes bagest i hæftet.
