# POLYSSIMO

A game of patience

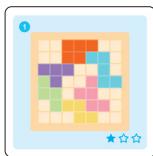

7-99 years

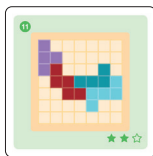

1 player

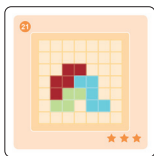

1 base, 11 wooden pieces (6 tetraminoes and 5 pentaminoes), 30 challenge cards (of increasing levels of difficulty)

★ Easy

★★ Moderate

★★★ Difficult

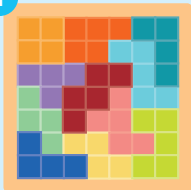

**Object:** reconstitute the square using all of the pieces.

**How to play:** Place the 11 pieces and the base on the table with the challenge cards to one side. Draw a challenge card and position the imposed pieces on the base as shown on the card. Then try to arrange the remaining pieces, grooved side up, in order to fill the base without any part of a piece sticking out beyond the edge of the square. For each challenge, there is only one possible combination.

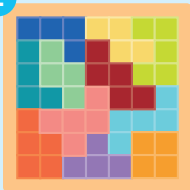

*Solutions at the back of the booklet.*
