

SHEEP LOGIC

5-99

5-99
5-99

A game of patience

5 to 99 years

1 player

1 board, 10 wooden dominoes, 30 challenge cards (of increasing levels of difficulty)

★ Easy

★ ★ Moderate

★ ★ ★ Difficult

Object: To reassemble the square using 8 of the 10 dominoes.

How to play: Place the 10 dominoes and the board on the table with the challenge cards next to them. Take a challenge card and position the required dominoes on the board as shown on the card.

Then try to fill the board by placing the dominoes so as to obtain complete sheep. There will be 2 dominoes left over.

For every challenge, there is only one possible solution!

Hint: Each domino features 1 or 2 sheep halves and a specific decorative element (ladybirds, blue flowers, yellow flowers, etc.).

Use these decorative elements to easily identify the dominoes required by the challenge card.

Solutions at the end of the booklet.
